PATIENT INFORMATION SHEET

Disperse Blue mix 106 / 124
(Mx-26)

Your patch testing results indicate that you have a contact allergy to Disperse Blue mix 106 / 124. It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

What is Disperse Blue mix 106 / 124 and where is it found?

Disperse Blue 106/124 is a dye used in textiles. It is also sometimes used in other products such as diapers and seatbelts. Further research may identify additional product or industrial usages of this chemical.

What else is Disperse Blue mix 106 / 124 called?

This chemical can be identified by different names, including:
C.I. Disperse Blue 106 C.I. Disperse Blue 124 Serisol 2R

If you are allergic to textiles dyes, the following instructions will be helpful:
- Wear 100% cellulose-based fabrics (cotton or rayon).
- Wear 100% linen, silk or wool.
- Washing all new clothes before use will only decrease, but not eliminate the problem.
- It is useless to avoid a specific color, because most dyes are blended to create other colors. This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY

- **Be vigilant... read the product label.** Always take the time to read the ingredient listing on product packages. This should be your first step each time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.
- **Test the product first.** If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.
- **Advise people you obtain services from of your contact allergy.** This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.
- **Inform your employer if the source of your contact allergy is work related.** You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.
If you have any future contact dermatitis concerns or questions, please call the doctor's office.
