

## PATIENT INFORMATION SHEET

### Triethylene glycol diacrylate

(T-017)

Your patch testing results indicate that you have a contact allergy to **Triethylene glycol diacrylate**. It is important that you familiarize yourself with this chemical and take steps to avoid coming in contact with it.

#### What is **Triethylene glycol diacrylate** and where is it found?

This chemical is used in coatings, adhesives and in photoprepolymer printing plates. Further research may identify additional product or industrial usages of this chemical.

#### What else is **Triethylene glycol diacrylate** called?

This chemical can be identified by different names, including:

*1,2-Ethanediylobis(oxy-2,1-ethanediyloxy) diacrylate, 2-Propenoic acid, 1,2-ethanediylobis(oxy-2,1-ethanediyloxy) ester C<sub>12</sub>H<sub>18</sub>O<sub>6</sub> TEGDA, TREGDA*

This may not be a complete list as manufacturers introduce and delete chemicals from their product lines.

### THINGS YOU CAN DO TO HELP MANAGE YOUR CONTACT ALLERGY

- **Be vigilant... read the product label.** Always take the time to read the ingredient listing on product packages. This should be your first step each time you purchase a product as manufacturers sometimes change product ingredients. If you have any concerns ask your pharmacist or your doctor.
  - **Test the product first.** If you have purchased a new product you should test it on a small skin area to see if you get a reaction before using the product on larger skin areas.
  - **Advise people you obtain services from of your contact allergy.** This should include people like your pharmacist, doctor, hairdresser, florist, veterinarian, etc.
  - **Inform your employer if the source of your contact allergy is work related.** You should identify the specific source of the chemical and take the necessary steps to avoid further exposure. Protective wear may be adequate or you may need to make a change in your work activities. Both you and your employer benefit when the cause of your occupational dermatitis is eliminated.
  - **"Google" it.** The internet is an excellent source of ingredient information that can be searched by product, by company and by specific chemical.
